

QUEST

# CT400

Contactless Payment Terminal

*Tap into a new way of cashless payment...*

Accepting payments reliably anywhere at your car wash is now available with the water and dustproof Quest CT400 Contactless Payment Terminal.

“No change? No problem!  
Just Tap and Wash!”

# HOW THE CT400 WORKS

# CT400

Easily manage your water and dustproof contactless reader by configuring a pre-set transaction amount using the Cloud EFTPOS web portal.

Once set, your reader will display the amount on its full colour display, ready to take payment using Visa, MasterCard, eftpos, and Amex\* contactless enabled cards, mobiles and wearables. Upon success of the transaction, site equipment is activated, with funds settled by National Australia Bank daily to your nominated bank account.

## FEATURES AND BENEFITS

- **Contactless-only.** Take advantage of Australia's fastest growing form of payment including new schemes and technologies such as eftpos Contactless, Apple Pay, Samsung Pay and Android Pay
- **Cashless and secure.** Eliminates the costs normally associated with management and security of cash collection
- **Highly Reliable.** Fully enclosed IP66 water and dustproof design can be installed anywhere onsite
- **Completely wireless.** Inbuilt 3G connectivity removes reliance on separate communications modules or local networks
- **Small Footprint.** One-piece design makes it easy to retrofit onto existing site equipment
- **Flexible integration.** Interfaces with a range of car wash equipment including self-serve and automatic systems, vacuums and dog washes
- **Cloud based configuration.** Cloud EFTPOS web portal provides setup and configuration of devices as well as software updates
- **Reporting.** Real time visibility of payments and cash flow
- **Daily Settlement.** Funds are deposited into your nominated bank account
